Tile entry/kitchen/baths, tile fireplace, tile bathroom and kitchen counter tops. Describe the condition of the property (including physical, functional and external obsolescence): The subject's improvements are noted to be in avg condition w/no physical, functional or external obsolescence noted. No "needed repairs" of significance were noted although it is possible that some may exist, especially if they were not readily visible to the appraiser. The appraisal should not be relied on as a substitute for a home inspection. While no physical deficiencies or adverse conditions that affect livability, soundness or structural integrity were noted, such items are often beyond the expertise of the appraiser. Issues of soundness or structural integrity are often related to areas that are unapparent or hidden from the appraiser's view. All utilities were on & functional at time of inspection.

File No.: GP116878.I

Assumptions & Limiting Conditions

			1 110 1101	0
Property A	Address: 4842 Camino Hermoso		City: North Las Vegas State: NV	Zip Code: 89031-1049
Client:	John Harney	Address:	400 Stewart Avenue, Las Vegas, NV 89101	
Appraiser:	Bruce Feldman	Address:	7357 Savannah Falls St, Las Vegas, NV 89131	

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- The appraiser may have provided a sketch in the appraisal report to show approximate dimensions of the improvements, and any such sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size. Unless otherwise indicated, a Land Survey was not performed.
- If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- If the cost approach is included in this appraisal, the appraiser has estimated the value of the land in the cost approach at its highest and best use, and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used. Unless otherwise specifically indicated, the cost approach value is not an insurance value, and should not be used as such.
- The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.
- If this appraisal is indicated as subject to satisfactory completion, repairs, or alterations, the appraiser has based his or her appraisal report and valuation conclusion on the assumption that completion of the improvements will be performed in a workmanlike manner.
- An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.
- The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database.
- An appraisal of real property is not a 'home inspection' and should not be construed as such. As part of the valuation process, the appraiser performs a non-invasive visual inventory that is not intended to reveal defects or detrimental conditions that are not readily apparent. The presence of such conditions or defects could adversely affect the appraiser's opinion of value. Clients with concerns about such potential negative factors are encouraged to engage the appropriate type of expert to investigate.

Definitions & Scope of Work

	T lie No.	0	
Property Address: 4842 Camino Hermoso	City: North Las Vegas State: NV	Zip Code: 89031-1049	
Client: John Harney	Address: 400 Stewart Avenue, Las Vegas, NV 89101		
Appraiser: Bruce Feldman Address: 7357 Savannah Falls St, Las Vegas, NV 89131			

DEFINITION OF MARKET VALUE *:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. Buyer and seller are typically motivated;
- 2. Both parties are well informed or well advised and acting in what they consider their own best interests;
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
- * This definition is from regulations published by federal regulatory agencies pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 between July 5, 1990, and August 24, 1990, by the Federal Reserve System (FRS), National Credit Union Administration (NCUA), Federal Deposit Insurance Corporation (FDIC), the Office of Thrift Supervision (OTS), and the Office of Comptroller of the Currency (OCC). This definition is also referenced in regulations jointly published by the OCC, OTS, FRS, and FDIC on June 7, 1994, and in the Interagency Appraisal and Evaluation Guidelines, dated October 27, 1994.

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. The appraiser, appraisal firm, and related parties assume no obligation, liability, or accountability, and will not be responsible for any unauthorized use of this report or its conclusions.

SUPPLEMENTAL ADDENDUM

. URAR : Subject - INTENDED USER/USE -

This report is intended for use only by John Harney/Assignee's. Use of this report by others is not intended by the appraiser. The Intended user is John Harney/Assignee's. The Intended Use is to evaluate the property that is the subject of this appraisal is for Asset Valuation Purposes, subject to the stated Scope of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Market Value. No additional Intended Users are identified by the appraiser. The scope of this assignment is specific to the needs of John Harney/Assignee's, the client and only intended user. All other parties that choose to rely on the appraisal report should recognize that the assignment results were not developed or reported in a manner consistent with the needs or uses of parties other than those identified by the intended user, John Harney/Assignee's.

. URAR: Site - Zoning Compliance

Statements regarding zoning compliance are intended in the most general sense. Zoning and building ordinances vary significantly from one municipality to another and are applied on a case by case basis. The scope of this assignment does not include a detailed analysis of every characteristic of the subject property's site and improvements relative to current zoning and building ordinances.

The subject is a single unit dwelling located on a site zoned for single unit use. Only in this general sense is it considered to "legally comply" with the local zoning ordinance. The appraiser has not made a detailed comparison of every property characteristic relative to local zoning and building ordinances.

• URAR : Site - Adverse Conditions or External Factors

While no adverse site conditions or external factors were observed, many site-related issues are beyond the scope of this assignment & the expertise of the appraiser. Unless otherwise noted, standard utility & right of way easements are insignificant to value. However, a current locational or boundary survey, which was unavailable to the appraiser, may reveal encroachments, easements, zoning violations, or other matters of interest that could warrant modification of the appraiser's analysis and opinions. This appraisal is not an environmental assessment of the subject property and should not be relied on as such.

Flood maps often lack sufficient detail to enable accurate determinations on the part of the appraiser. Please note Limiting Condition 3 on page 4 of this report.

. URAR : Improvements - Attic's/crawlspace's

Attic's and crawlspace's are not part of the appraiser's complete visual inspection. Consequently, the appraisal does not address quality or condition issues related to attic or crawlspace areas.

. URAR: Improvements - Infestation

At the time of viewing, specific signs of infestation were not noticed by the appraiser. However, the appraiser is not an expert in this area and did not conduct the type of intensive inspection required to discover infestation. If concerned, the client is invited to employ the services of an expert in the area of infestation.

The reader is directed to LImiting Condition 5 on page 4 of this report to understand the limitations on the appraiser's responsibilities relative to hidden or unapparent physical deficiencies or adverse conditions of the property. The appraisal should not be relied on as a substitute for a home inspection.

. URAR: Improvements - Dampness

At the time of viewing, specific signs of dampness were not noticed by the appraiser. However, the appraiser is not an expert in this area and did not conduct the type of intensive inspection required to discover dampness. If concerned, the client is invited to employ the services of an expert in the area of excessive moisture and/or dampness.

The reader is directed to Limiting Condition 5 on page 4 of this report to understand the limitations on the appraiser's responsibilities relative to hidden or unapparent physical deficiencies or adverse conditions of the property. The appraisal should not be relied on as a substitute for a home inspection.

. URAR : Improvements - Settlement

At the time of viewing, specific signs of settlement were not noticed by the appraiser. However, the appraiser is not an expert in this area and did not conduct the type of intensive inspection required to discover settlement. If concerned, the client is invited to employ the services of an expert in the area of settlement.

The reader is directed to Limiting Condition 5 on page 4 of this report to understand the limitations on the appraiser's responsibilities relative to hidden or unapparent physical deficiencies or adverse conditions of the property. The appraisal should not be relied on as a substitute for a structural engineering report.

. URAR : Improvements - Condition of foundation walls, exterior walls, roof surface

The actual condition of items like foundation walls, exterior walls, and roof surface can be difficult to assess. Often, significant portions of these items can be hidden from view and even under the best conditions the appraiser can only view surface areas. The origin of many problems related to foundation walls, exterior walls, or roof surfaces are internal and thus hidden from the appraiser's view.

Supplemental Addendum

		Supplemental Addendum	File	No. GP116878J
Client	John Harney			
Property Address	s 4842 Camino Hermoso			
City	North Las Vegas	County Clark	State NV	Zip Code 89031-1049
Lender	John Harney			

The reader is reminded that Limiting Condition 5 on page 4 of this report states that the "appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist."

The subject's exterior finish may be EIFS, or synthetic stucco. EIFS is an acronym used by architects and others in the building trades that stands for Exterior Insulation and Finish System. A typical EIFS finish, or cladding, utilizes a foam board (usually expanded polystyrene) attached to a substrate (sheathing) such as plywood, oriented strand board (OSB), exterior grade gypsum board.or cement based composition board. The foam is then covered with a fiber mesh, embedded in a thin base coat of cement like material. A finish coat of colored textured latex based material is applied over the base coat. The result is a durable finish with good insulation properties and excellent aesthetic flexibility.

Properly applied, the finish coat is relatively maintenance free and waterproof. However, if water does penetrate the finish (usually through improperly caulked window and door openings) it cannot easily escape. The trapped water creates the potential for decay and rotting of both structural and non structural framing members.

If EIFS is applied per the manufacturer's specifications and properly maintained thereafter, most installations will be moisture free.Some EIFS installations are now designed with drainage mats (under the foam) that allow moisture to escape. It is unknown whether the subject has a barrier or drainage EIFS cladding.

The appraiser is not an expert in the field of evaluating problems associated with EIFS systems. It is recommended that the client employ qualified experts to inspect and address any area of concern. If negative conditions are discovered, the value estimate will likely require modification.

"The intended user should be aware that the term "Inspection" may be found on this standard appraisal form. The appraiser is required to use this form, and cannot modify it. The term inspection found anywhere in this report is to mean a "Personal Visual Inventory" of the subject's or comparable property's components. This is opposed to a "Home Inspection," which investigates the appropriateness and soundness of various components of the improvements."

. Certification

The reported value contained in the attached report is an unbiased, independent valuation of the subject property. The appraisal is not based on any of the following: a requested minimum value, a specific value or the approval of a loan.

.Lead Based Paint Disclosure

If the subject was constructed prior to 1978 there may or may not be lead based paint and/or other hazardous substances. The client is hereby notified that the Appraiser is not qualified to detect these substances and that it is beyond the scope of this appraisal to ascertain the presence of lead based paint and/or other hazardous substances that may be present in the subject property. The client is advised to consult a qualified expert(s) in the detection of lead based paint and/or hazardous substances if further information is desired.

Special assessments, easements, liens see title report.

Reconciliation and comps/listings

Due to the market being driven/defined by bank owned/short sales/foreclosures there can be a wide range of values on sales and listings. Sales prices seem to be more dependent on what the bank has had to lose on the property and how quickly they need to move the property and how much more they are willing to lose on it to do so. This varies from bank to bank. Thus often times there appears to be no real pattern to the sales and listings.

Often times properties are listing very low in order to generate activity and bidding wars, so the list price is not always a good indication of what is truly happening in the market. This can lead to an overinflated SP/LP ratio. Other times listings can be a good indication of what is happening in the market.

REO's are persistently present, competing with and thus having an impact on the market. Due to their prevalence in the market it was necessary to utilize such properties in the report.

Comparable selection:

Beginning search parameters were seeking SFR within the same subdivision, then expanded to a one mile radius, within 20%+/-GLA, age range 5 years +/-,closed within the past 6 months, with contract date given weight in selection as well. The sales chosen for gridding were by similar bedroom count and room count to match utility attracting the same buyers.

Foreclosure/REO Activity:

Of the total comps found in the comp sale search the majority were bank owned properties. The comps selected were found to be among the most similar sales and most proximate sales to the subject.

Final Reconciliation:

Having analyzed all sales, more weight is given to the comps with lower adjustments and more recent contract date. All sales were considered equal in function and/or appeal to the same market of buyers and thus all were given consideration.
